the issues of the Eastern banks circulate in Highest and adjoining States, and if they are qualite to redeem this fraction in legil tender they are no better than counterfelts, and it is little last than criminal to ask farmes and mechanics to take such base trash in payment for their hard tool.

But we see told that we must have cords of shinplasters of the East to more our crops. This all humbag. It is the same old song that was sung in our care in justification of the Hilmols and Wisconsin while at expansion that ended so disastrously.

It is nert asserted that, if the wild-cats are sent none as assemptions these will not be greenbacks enough to do business. We must many latest the property of the control of the liminal sent that ended so disastrously.

We confirmed that as wild-sets travel home greenbacks will pour in to the West, and fill the vactuum. If the volume of currency be contrasted, gold will fall, and consequently best currency will be required to do the business of the country. If half the currency were retired, gold and greenbacks would be of equal-wine; then half the currency be ontrasted, gold and greenbacks would be off out which the country is the property of the country. If half the currency become of the country. If half the currency were retired, gold and greenbacks would be off out while it country goins bothing by expansion, while it losse in security. It is like filling a man with whicky—dimulating him, making him feel rich and reckless that notified to he strongth or and the broad of the country is the property of the broad of the second the broad of the second to be taken prisoners to the same to the same to be in the broad of the second to the second t

But nothing is added to his strength or sense, by keeping him intoxicated. Better let him get sober. Better let the currency be constructed until a paper dollar bears some desent relation to a gold one.

If the Chicago Beard of Trade beeks down from the manly and correct financial position it has taken, it must blame only itself if it recurres the demandations of the whole building of the West. But a back down now well sour restore confidence in the wild building of the West. But a back down now well sour restore confidence in the wilding of the west than the farmen have resolved not to tought them. The industrial classes are determined to have the greenbacks and nothing elies, and our floor of Trade may as well restain the glosy of having set the ball in motion to give the West a National currency.

It is pre-embranity a character novel, depicting in strong colors the seculiarities of New England life and mancers. There are occasional bits of rural doctriptions, but it is mainly devoted to descriptions of types of character, some of them weak, some of them overdrawn, and some shoultely life-like. There is, however, a blending of presion and romance with this usual life, which we should havely look for ma New England farm, or expect to said in rigid character novel.
